

# SAFE, GLOBAL, MISSION-CRITICAL BUSINESS AVAILABILITY

Interconnection solutions for business digitalization

Together, DXC and Equinix deliver global interconnection solutions for companies in the process of business digitalization. We enable a shorter time-to-market for new business offerings and successful integration with broader ecosystems. Mitigating the complexity and risks of digital transformation, we re-architect your distributed infrastructure with private interconnection, delivering safe, global mission-critical business availability.

Our consumption-based model allows for the optimization of infrastructural and operational costs, and our distributed data management service optimizes your vital data storage and retrieval.

## The major challenges you face

### Gaining a flexible infrastructure

As you expand to reach new markets, how can you achieve the flexible infrastructure you need to globally interconnect your business-critical systems with the multicloud?

### Overcoming a lack of resources

When you need to move systems to the cloud to gain interoperability with partner, customer and application ecosystems, how can you address a lack of knowledge, resources and even strategy?

### Reducing infrastructure costs

When you want to improve your data center or on-prem budgeting, how can migrating to the cloud provide the solution you need?

### Achieving business continuity

How can you overcome the complexities of securing cloud data, achieving fast implementation of business continuity with data security and compliance?

## The key benefits of our joint solution

### Simplifying digitization

We provide flexible global and local availability for business expansion – enabling fast and secure interconnection with remote ecosystems and clouds – and manage your on-prem and cloud systems.

### Achieving cloud transformation

Our all-encompassing, problem-solving multicloud migration solution includes cloud strategy definition, hybrid cloud set up and interconnection with cloud brokerage for the different providers.

### Lowering costs

Our flexible pay-per-use model lowers your costs of ownership. We analyze your inventory, provide a business case and advise on the most convenient providers for an OPEX offering.

### Securing data resiliency

Providing end-to-end security, we move your disaster recovery architecture to the cloud for security optimization and the implementation of business continuity for mission-critical data.

Achieve digitalization with mission-critical business availability around the world

## Our leading capabilities that enable success

### Building, hosting and optimizing

Integrating your customer offerings with the services of your business partners, we build private exchange and distribution points close to global and local ecosystems. We host your systems in compliance-ready data centers, and enable globally private interconnections that are scalable on demand and high performing.

### Equinix SmartKey™

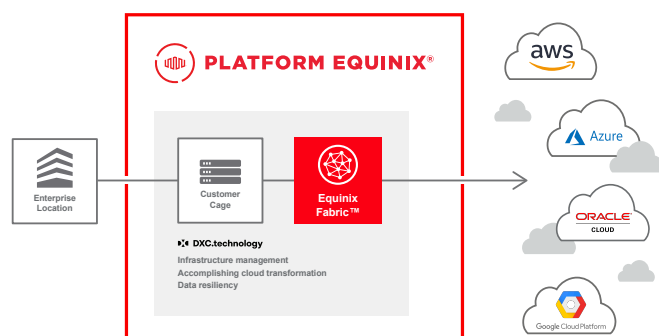

A global SaaS-based, secure key management and cryptography service, Equinix SmartKey simplifies data protection and enables you to achieve GDPR compliance and data sovereignty. Featuring SSL/TLS server integration to close the encryption gap, Equinix SmartKey keeps all keys within the trust boundary.

### Equinix Fabric™ and Network Edge

Over a self-service portal or API, Equinix Fabric directly, securely and dynamically connects distributed infrastructure and digital ecosystems on Platform Equinix® via global, software-defined interconnection. With Equinix Network Edge, you can configure and connect virtual network services at the edge in minutes.

### Platform Equinix

The leading global digital enablement platform for interconnecting your business, Platform Equinix lets you reach everywhere, interconnect everyone and integrate everything. You can quickly place your solutions within the richest digital ecosystems for game-changing advantages in speed, performance and scalability.

## About DXC

Our services include IT Outsourcing, Cloud and Security, Applications, and Analytics and Engineering. We combine mission-critical systems expertise with digital innovations to deliver better outcomes, performance, competitiveness and experiences.

## About Equinix

Equinix is the world's digital infrastructure company. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. We enable our customers to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.
